

## SERIES 200

### *“THE ORIGINAL”*

#### *Rolling Steel Sheet Doors*

MODEL 211-COMMERCIAL / MODEL 231-INDUSTRIAL / MODEL 232-INSULATED MODEL 233-WINDLOCKED® / MODEL 234-INSULATED / WINDLOCKED®

#### STANDARD ITEMS:

- **Greaseless Nylon Bearings:** This exclusive feature delivers longer life than metal bearings, without costly maintenance.
- **Drum Assembly:** The counter balancing mechanism is housed in this unique, roll-up assembly.
- **Lock Seam:** The sections are lock seamed together. If one section is damaged beyond repaired, it can be easily replaced.
- **Weather Seal:** A blade astragal made from E.P.D.M., a highly resilient and flexible rubber compound, runs the full length of the bottom angle to seal the threshold of the opening. This forms a barrier against weather, dirt, insects and rodents.

● **Guides:** Roll formed single piece guide standard on all doors.

● **Chain Operation:** Smooth hand-chain provides safe and comfortable operation eliminating the sharp edges common to lock link hand chain.

● **Locking Assembly:** Exclusive tamper-proof slide bolt lock accommodates two padlocks for double protection.

● **Galvanized Steel Curtain:** A continuous sheet of .021” galvanized steel delivers maximum security.

● **Other Models:**

**Commercial Model 211**

**Industrial Model 231**

**Insulated Model 232**

**Windlock Model 233**
